

Coin Troll Adventure - Project Lists

Consolidated character, level design, tracking, and remaining-work lists based on the current project notes and recent planning.

Characters

Character	Role / Notes
CT / Coin Troll	Main playable character and coin-focused protagonist.
Alex	Hero/protagonist figure; duel participant and ship crew member.
Felix / Flex	Companion character; follows CT in forest segments.
Sigh / Pink Girl / Pinky	Shield hero who blocks Big Boss and defeats him.
Lala	Observer/analyzer; explains suit, Queen, Sacavuelo, and Sand Land.
Queen / Queen of Winds / Mujerdeviento	Powerful royal character; rescues ship and handles major threats.
Big Boss	Major villain; sword/shockwave boss and final-battle candidate.
Horn	Aggressive pursuer; cliff ambush and forest chase threat.
Sword	Pursuer/story character associated with Horn.
Big Bird / Sacavuelo	Projectile-type duel boss with boomerang pressure.
Diskoreck	Sand Land rank boss introduced in Chapter 8.
Ahrena	Dangerous ruler/boss of Sand Land, contract target.
Mayor	Offers CT the coin contract in Sand Land.
Rival / protagonist silhouette	Background rival seen during early treasure chase.
Crowd	Ship-deck spectators and coin-drop source.
Guards	Queen/ship-side support characters.

Enemy / NPC Types

Skull enemies, Elite Skull, Shadow Avatars, Barreldugo, Tank enemy type, Speed enemy type, Projectile enemy type, Charging Bulls, Minor Bulls, Flying ship creatures, Sand enemies / trap enemies, Sand Wormfish.

Currently Implemented Character Files

Implemented	File
Player	Scenes/Characters/Player/player.tscn
Top-down player	Scenes/Levels/td_player.tscn
Skeleton enemy	Scenes/Characters/Enemies/skeleton/orange/skeleton_orange.tscn
Horn behavior	Scenes/Characters/Enemies/skeleton/orange/Horn.gd
Felix companion	Scenes/Levels/felix.gd

Level Designs

Level	Name	Design
1	Bush Maze Sneak	Coin collection tutorial in hedge maze with skull patrols and spike traps.
2	Treasure Chase	Timed chase to treasure chest with faster skulls, elite blocker, and elevated platforms.
3	Shadow Flood	Online-world chaos: collect coins while avoiding shadow avatar spawn hazards.
4	Boss Dodge	Survival arena against Big Boss sword slashes and shockwaves.
5	Reinforcement Wave	Side-corridor defense against skull waves while Sigih fights Big Boss in background.
6	Cliff Panic	Cliff ambush: dodge Horn charges and skull enemies; survive or trigger scripted fall.
7	Forest Exploration	Relaxed forest exploration with Felix, hidden coin clusters, and light enemies.
8	Forest Escape	Auto-scroll forest chase with Horn as background pressure, logs, trees, and projectiles.
9	Combat Tutorial	Fight Tank, Speed, and Projectile/Barreldugo enemy types to teach weaknesses.
10	Bull Stampede	Survival/combat level with charging bulls; dodge charges and defeat minor bulls.
11	Duel Warmup	Ship-deck warmup: collect coins and clear flying creature waves.
12	Boomerang Duel	Boss-style Sacavuelo/Big Bird fight; dodge boomerang pressure and get close.
13	Crowd Scramble	Coin scramble near duel crowd while dodging debris and projectile hazards.
14	Victory Rush	Low-stakes celebration coin rush on the ship deck after Alex wins.
15	Ship Disaster	Tilting ship survival puzzle: climb upward, dodge crates/debris, reach safety.
16	Sand Land Intro	Desert exploration with slowed sand movement, ruined town, hidden coins, quicksand.
17	Contract Panic	Frantic coin scramble after CT signs contract; quicksand, traps, collapsing ruins, coin bag goal.
18	Wormfish Chase	Auto-scroll desert chase with Sand Wormfish behind player and falling rocks.
19	Big Boss Final	Future final boss: shockwaves, projectiles, falling debris, and full skill use.

Lists Still Needed

- Asset list: backgrounds, tiles, props, coins, attacks, enemies, and UI art.
- Scene list: playable levels, UI scenes, managers, sub-scenes, prototypes.
- Script list: player, enemy, level controllers, UI, autoloads.
- Broken/error list: current Godot parse, runtime, and import errors.
- Level-to-story map: which chapter segment loads which level scene.
- Missing character assets list: story characters not implemented as real Godot scenes.
- Enemy/mechanic list: enemy type, hazard, objective, timer, coin target, win condition.
- Audio list: music and SFX needed for each chapter/level.
- Final demo checklist: title to chapter to comic to playable segment to completion.

Work Left

- Fix any remaining Godot errors after reopening the project.
- Connect ChapterData.gd playable segments to real level scenes instead of PROTO_LEVEL.
- Verify levels 8-18 open correctly and are playable.
- Customize level 8-18 layouts so they are not just duplicated maps.
- Add or replace missing story characters: Alex, Lala, Queen, Big Boss, Big Bird, Mayor, Diskoreck, Ahrena, and others.
- Add proper enemy variants: bull, shadow avatar, Barreldugo, sand enemies, wormfish.
- Add hazards/mechanics: quicksand, falling debris, sliding crates, auto-scroll chase, boss attacks.
- Add Level 19 Big Boss Final if the game should have 19 total levels.
- Clean duplicate and unused assets only after reference checks.
- Fix broken or missing resource references.
- Run full playtest: title -> chapter select -> comic -> playable level -> completion.
- Update README, changelog, and review notes after the project stabilizes.

Project Board Tasks Left

- Finish Phase 1 reference validation.
- Finish Phase 1 safe asset optimization.
- Locate Godot CLI/editor path and run import/editor warning check.
- Create Phase 2 folder organization plan.
- Move runtime assets into clean folders after references are mapped.
- Move scenes into gameplay folders after asset moves.
- Normalize top-level level scene structure.
- Remove dead and empty nodes.
- Split WebtoonReader.gd, td_player.gd, and skeleton_orange.gd.
- Convert magic numbers to resources/constants.
- Replace fragile node paths.
- Map existing Godot levels to 19 prototype/PDF segments.
- Create reusable level archetypes.

- Verify Chapters 1-8 segment mechanics and win conditions.
- Audit and restructure save data with default/migration handling.
- Run static reference scan and editor warning pass.
- Playtest full chapter flow.
- Verify input map, including move_down null input.

Note: Level 19 is listed as a future/prototype design, not as a confirmed existing editable Godot level in the current level_8 to level_18 batch.
